SUMMARY

Data engineer who learns new technologies fast and applies them straight away. Supports SQL workflows, data-quality checks, and troubleshooting in a GCP and BigQuery healthcare production environment at Cognizant, while shipping personal projects in PySpark, Azure Databricks, Streamlit, and GenAI. Databricks and Azure certified.

TECHNICAL SKILLS

Languages: SQL, Python, PySpark, Spark SQL
Data Engineering: ETL/ELT, Medallion Architecture, Dimensional Modelling, Data Warehousing, Data Pipelines, Root-cause Analysis
Cloud & Platforms: Azure Services, Azure Data Factory, ADLS Gen2, Delta Lake, Databricks, Google Cloud Platform, BigQuery
Tools & Analytics: Numpy, Pandas, Plotly, Streamlit, REST APIs, Google Gemini API, Git, CI/CD Concepts

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions June 2025 – Present
Programmer Analyst | Bayer Healthcare Radiology Project Hyderabad, India

- Maintain and update SQL workflows for an enterprise healthcare environment, validating query outputs and analyzing process-level data.
- Investigate workflow and data issues using GCP BigQuery to keep daily data operations running reliably.
- Monitor pipeline executions and data movement in the GCP environment to catch failures and delays early.
- Run data-quality checks for freshness and schema changes, and lead root-cause analysis of anomalies with cross-functional teams.
- Troubleshoot QA environments by tracing workflow variables and dependencies to identify why unexpected downstream pipelines were triggered.

PROJECTS

DataSentinel AI – AI-Assisted Data Quality Monitoring GitHub | Live Demo
Python, PySpark, REST APIs, Medallion Architecture, Google Gemini API, Streamlit, Plotly

- Built a PySpark pipeline that ingests product and cart data from REST APIs and processes it through Bronze, Silver, and Gold layers.
- Implemented automated data-quality reporting and a Streamlit dashboard to surface pipeline outputs and quality signals.
- Integrated Gemini API to summarize detected anomalies, likely root causes, and recommended follow-up actions.

Azure E-Commerce Analytics Pipeline GitHub
Azure Data Factory, Azure Databricks, ADLS Gen2, PySpark, Delta Lake, Power BI

- Designed an ETL pipeline with Azure Data Factory and Databricks that moves e-commerce data through Bronze, Silver, and Gold Delta Lake layers.
- Applied PySpark cleansing and KPI aggregations, and built Power BI dashboards for sales and regional performance.

Entertainment Analytics Pipeline GitHub
Python, Pandas, TMDB REST API, Streamlit, Data Quality

- Built an API-driven extract-and-transform workflow with validation for nulls, duplicates, and consistency.
- Created a Streamlit dashboard to explore ratings, genre trends, language preferences, and performance metrics.

CERTIFICATIONS & TECHNICAL EVENTS

- Databricks Certified Data Engineer Associate (LinkedIn)
- Microsoft Certified: Azure Data Fundamentals (DP-900)(LinkedIn)
- Build with Gemini – Event participation and Skill badge (LinkedIn)

EDUCATION

CMR College of Engineering & Technology, Hyderabad – B.Tech, CSE (AI & ML), CGPA 8.41 2021 – 2025

AWARDS

- Top 15 of 2,500 participants – IET Karamveer Project Expo, Nashik (2024)
- National Best Project Award – National Hackathon, OIST Bhopal (2023)
- Best Project – CEER, CMR College of Engineering & Technology (2022)
